TINTIC STANDARD IS

***EARING FISSURE**

The drift being run from the 700-foot level at the Tintic Standard is now in about 190 feet, and for two or three days past the formation has displayed an encouraging change. Good-looking quartz has been encountered and as amother fissure is neared there is every in dication that are will be found. Local interests in the Standard are confident of making a mine of their prospect, and they become more confident with every shift's work.

**Manager S. M. Levy of the Ely Consolidated property received information Wednesday to the effect that the ore beds recently uncovered in the drift west from the American shaft is growing in should recently uncovered in the eller that the ore beds recently uncovered in the eller that the ore recentl
